**2nd And 3rd Row Seats Folded Down**

Carries two people with ample cargo space for large and bulky items.

**RX270XDi**  
165ps (121kW) 2,696cc

#### **Economy, Performance & Reliability**

The SsangYong 270 XDi 3rd Generation Common Rail Injection Turbo Charged power plant delivers the best-in-class performance and fuel efficiency. The maximum torque of 340 Nm is delivered from as low as 2,400 rpm and this provides for optimum acceleration, performance and fuel efficiency.

#### **Mercedes Benz 5-Speed Automatic Transmission With Dual Thumb-Tronic Controls**

The Mercedes Benz 5 speed automatic transmission is equipped with SsangYong's ingenious dual Thumb-Tronic controls and gear changes can be made via the buttons on the steering wheel or on the gear shift lever.

The gearbox is electronically controlled and the software has been designed to maximise the characteristics of the 270 XDi power plant. An Artificial Intelligence program constantly monitors your driving style and adjusts the transmissions characteristics to maximise performance according to your driving pattern, which in turn optimises, fuel efficiency and of course driving pleasure. The transmission is linked to the engine via a lock-up torque converter which minimizes energy loss and further improves fuel efficiency.
